

# EVO J-BOX

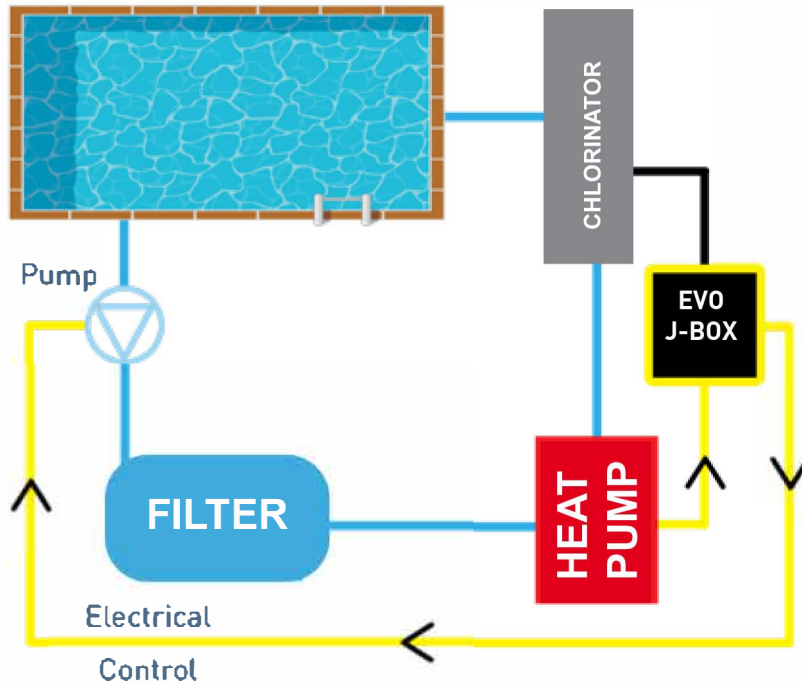

SAVING TIME, ENERGY & MONEY

The Evo J-Box allows your heat pump to turn the main water pump on outside of your filtration times  
**SAVING YOU TIME, ENERGY AND MONEY!**

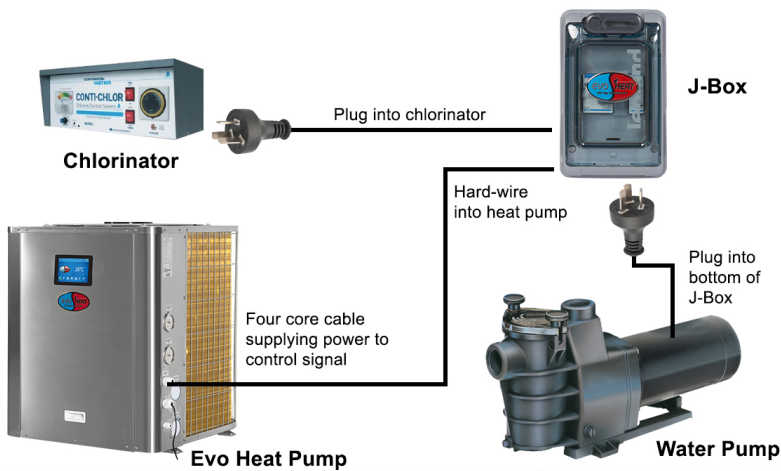

## BENEFITS

- Simple to install
- Easy to use
- Save on running costs
- Set and forget
- No water balance issues
- Only require one water pump

# EVO J-BOX INSTALLATION GUIDE

## EASY INSTALLATION - ELECTRICAL CONNECTION

### NOTES:

- The heat pump, J-Box & water pump are all on the same circuit.
- The electrical connection of the J-Box is separate to the electric connection of the Heat Pump.
- The J-Box is supplied power via the chlorinator, whereas the Heat Pump requires an independent power supply.
- Please refer to the Heat Pump owner's manual for power supply requirements and details on electrical connection.

### Connecting to Heat Pump Terminal Block:

Connect JBox Active to Heat Pump Active (Brown Cable)

Connect JBox Neutral to Heat Pump Neutral (Blue Cable)

Connect JBox Earth to Heat Pump Earth (Green/Yellow Cable)

Connect JBox Pump Active to Heat Pump Termi 1 or Water Pump L - depending on model (White Cable)
