ACCESSORY

EVO LOUVRE

REDIRECTS COLD AIR DISCHARGE

IDEAL FOR LIMITED SPACE INSTALLS

Designed to improve airflow and ventilation while enabling installation in tighter spaces.

SUFFICIENT AIRFLOW AND VENTILATION

The angled louvre redirects the cold discharge air away from your EvoHeat pump.

SLEEK & STYLISH

Stylishly designed to blend seamlessly with your Evo heat pump without compromising its appearance.

DURABLE

Constructed from premium lightweight, powder-coated aluminium for a durable, weather-resistant finish.

SIMPLE INSTALLATION

Simply attaches to the Evo heat pump via fixing points on either side of the louvre.

SPACE-SAVING SOLUTION

DESIGNED TO REDIRECT COLD DISCHARGE AIR

The Evo Louvre is a purpose-designed air deflector that redirects cold discharge air away from your EvoHeat heat pump, improving airflow and ventilation while allowing installation in tighter spaces.

Constructed from lightweight, powder-coated aluminium, the Evo Louvre mounts directly to your EvoHeat heat pump using the integrated fixing points on either side of the unit. Its precision-engineered angled louvres ensure efficient air redirection.

THE EVO LOUVRE CAN BE INSTALLED TO DIVERT AIR UPWARDS OR TO EITHER SIDE

Available in grey or white.
Available in several sizes.
